

Advanced Laparoscopic Course: Cadaver Workshop

Course Overview:

This course is aimed at intermediate to advanced level laparoscopists, who wish to improve their surgical skills. At the end of the workshop, delegates will be equipped with greater understanding of the anatomy of the pelvis with particular reference to ureter, vessels, nerves and the pelvic floor. The workshop will include video presentations, group discussions and supervised cadaveric hands – on dissection. Furthermore, delegates will be able to practice Level 3 procedures under the tutelage of world-renowned experts.

Course Objectives:

At the end of the course, participants should be able to:

Describe and appreciate the following anatomy:

- Lateral pelvic side wall: ureter, vessels, development of obturator space
- Pelvic floor: sacrospinous, cardinal ligaments and pelvic floor muscles
- Pelvic neuroanatomy: obturator, genitofemoral nerve, lumbar sacral plexus
- Development of para-rectal and rectovaginal space

Perform the following laparoscopic procedures:

- Total and Radical Hysterectomy
- Pelvic and Para-aortic Lymphadenectomy, Sacrocolpopexy
- Omentectomy, Appendicectomy, Peritonectomy

Deal with Complications:

- Bowel and Bladder repair, Vessel injury

Course Outline:

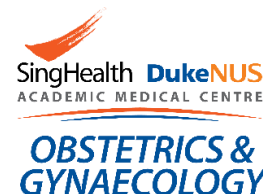

Title:	Advanced Cadaveric Workshop
Date & Time:	0800 – 1730, 6 July 2016
Venue:	Academia, 20 College Rd, S (169856)
Chief Instructor:	Prof Michel CANIS
Faculty:	Prof Masaaki ANDOU, Dr Tomonori HADA, Prof Kim Dae Yeon, A/Prof Timothy Lim, Prof LIN Wu-Chou, Prof Wang Peng-Hui

Prof Michel Canis

Who Should Attend:

Residents, Gynaecologists, General Surgeons, Surgical Oncologists
